

1 SUSY2007, Karlsruhe, July 26-August 1, 2007.

The 15th Annual International Conference on Supersymmetry and Unification of the Fundamental Interactions will be held in Karlsruhe, Germany from July 26-August 1, 2007. The conference will be hosted by the University of Karlsruhe, located 100 km south of Frankfurt.

Since their inception in 1993, the SUSY conferences have become the largest annual international meeting devoted to new ideas in particle physics. The clear establishment of a large fraction of Dark Matter and Dark Energy in our universe cannot be explained by the Standard Model of Particle Physics (SM). Supersymmetry (SUSY) has become the prime paradigm for physics beyond the SM.

SUSY07 takes place just before the start of the Large Hadron Collider (LHC), widely anticipated to yield evidence for SUSY and the Higgs bosons. With roughly 200 plenary and parallel presentations, SUSY07 will provide a focus for the growing excitement in high energy physics, as theorists and experimentalists discuss new results and plan for the future.

For registration and further information on the conference, see:

The conference program starts in the morning of Thursday, 26 July and finishes on Wednesday, 01 August at lunchtime.

2 PreSusy07 Summer School: July 23-26, 2007
